Embedded Java Applet

[More details, including a live example](#)²

- Insert an appropriate **include** tag in a Daisy simple document ...
- - At the document root of your web server create the following directory ...
 - **mkdir -p applet/example_000/**
 - In the **example_000/** directory, create an HTML file taking note of the Java Applet tag **code** and **codebase** ...

```
<html>
  <body>
    <applet code="Example_000" codebase="/applet/example_000" width="120"
height="80">
      Your browser doesn't support Java applets
    </applet>
  </body>
</html>
```

- Place the Java Applet source code [Example_000.java](#)³ in the **example_000/** directory.
- Compile the Java Applet ...

```
javac -source 1.2 -target 1.1 Example\_000.java4
```

- Ensure that appropriate read access is enabled ...

```
chmod 444 *.html *.java *.class
```
